

Puttshack PH response, August 4 BHZ

Your name (optional)	
Comments- all will be part of the public record	respectfully ask the committee to carefully consider the impact that outdoor dining at Puttshack could have on the character of our neighborhood. One of the things that makes this block special is its peaceful, walkable atmosphere. The sidewalks are not just a place to pass through—they are part of the experience of living and visiting here. Introducing a large outdoor dining area for a national entertainment chain risks changing that atmosphere by increasing noise, congestion, and activity in a space that has long been enjoyed for its quiet character. It's also important to recognize that Puttshack already has a significant amount of indoor seating, and those tables are not consistently at capacity. Given that existing indoor dining appears sufficient to meet demand, expanding onto the public sidewalk does not seem necessary. This is not about opposing new businesses or economic activity. It's about preserving the unique qualities of our neighborhood while allowing businesses to thrive within the space they already have. Once sidewalk dining is approved, it can permanently change the feel of a block that residents and visitors have come to value. I encourage the committee to prioritize the long-term character, safety, and livability of this neighborhood and deny the request for outdoor dining tables.
