You don't often get email from kariinaspen@yahoo.com. [Learn why this is important](#)

Dear Saint Paul City Council,

I am writing to express my profound concern regarding the proposed \$1,011.21 special assessment for street improvements affecting City Walk Condos (property ID# 31-28-22-43-1346). This assessment represents a significant financial hardship for many residents, and I believe the current proposal is fundamentally unfair and unsustainable.

The proposed assessment, coupled with recent increases in city, county, and property taxes, places an undue burden on homeowners already struggling with the rising cost of living. Many City Walk residents are on fixed incomes and face difficult choices between essential needs like food and medicine. An additional assessment of this magnitude could have devastating consequences for their well-being.

The rationale for this assessment, specifically for street improvements on a four-block stretch, requires further scrutiny. A considerable portion of this area serves not only City Walk residents but also a large volume of Minnesota state residents, tourists, and visitors to the downtown area. It is inequitable to place the entire financial burden solely on a small number of homeowners while the wider community benefits from improved infrastructure. The State of Minnesota and the City of Saint Paul should share a significant portion of the costs, reflecting the broader usage of these streets.

Furthermore, the primary access point for City Walk Condos is 7th Street, not Minnesota Street, which I rarely use personally. My typical routes utilize Robert Street or Wabasha Street to access the highway system. This further underscores the disproportionate impact this assessment will have on our community.

As a member of the City Walk Condominium Association Board, I can confirm that sadly we are being forced to increase in HOA fees. This assessment will further exacerbate the financial hardship for our residents. We urge the City Council to reconsider this assessment and explore alternative funding mechanisms that distribute the cost more equitably amongst those who truly benefit from the improvements. We believe a fairer solution exists that avoids imposing such a severe financial strain on a vulnerable population.

Sincerely,

Kari Aeng
