Subject: Objection to 90 dB Hearing Variance for University of Saint Thomas football games at STU stadium
Date: Monday, August 10, 2026 3:56:24 PM

Some people who received this message don't often get email from lmudrak@handsonheart.com. [Learn why this is important](#)

Dear City Council Members,

I live at 65 Cretin Ave N directly across the street from the Saint Thomas University o'shaugnessy football stadium and I object to the 90 dB sound variance for the University of Saint Thomas football games for any day or time. 90 dB blasts thru my closed glass windows and vibrates the glass panes on my front windows facing east to the stadium. It is unpleasant to shut myself into my house on an autumn evening to avoid the sound in my yard, and the sound is painful in my house even with the windows closed. The speakers at the stadium are located high up, way over the stadium walls and the noise amplifies as it travels over the stadium walls to my house. The 90 dB sound is disturbing and disruptive. The sound would not be so loud into my house if the speakers were lower or there was a much lower sound variance.

Please do not compromise the health and sanity of myself and my neighbors by allowing a football game to blast at 90 dB. The volume is really unbearable.
