Greetings -

I live in the Como-Eustis area served by the original 1918 sanitary lift station. Our household's understanding of the issue about which we received notice a Notice of Public Hearing is that the City Council will decide at the 8/19/2026 hearing whether to establish the proposed SSSACC--and, if approved, the owners of the new development in this area that will put increased demand on the lift station will be responsible for all costs connected to such additional burden.

We believe that this proposal--if we understand it correctly--should pass. It is only fair that those of us who own property in this area should not have to pay for any portion of improvements to the lift station caused by the additional burden on it by the new development.

Thank you for your consideration.

- Barbara Holmes, 2366 Valentine Avenue, St. Paul, 651-308-5889
