Regarding special sanitary sewer heating for hearing 8/19

Hello council ,

I live on Eustis at 1286. I want to learn more and understand this proposal. What is the impact directly on my property? Is there any cost to me? Are there any disruptions to any of my services including water or sewer? Any road closures? When will this possibly take effect?? What of problems arise after project? Who is responsible? Is this related to the possible new development across from Health Oartners or the proposed new one in place of the seminary?

Please Advise!
